EDUCATION

Bachelor of Technology in Computer Science and Engineering (AIML) **2022 - 2026**
Sai Vidya Institute of Technology, Rajanukunte
CGPA: 8.80
Relevant Coursework: Machine Learning, Deep Learning, Big Data, NLP, Prompt Engineering, RAG

TECHNICAL SKILLS

Programming Languages: Python (Proficient), SQL, C/C++, React, JavaScript,
Core CS: Data Structures & Algorithms, OOPs, OS, DBMS, Computer Networks, System Design
AI Expertise: Prompt Engineering, LLM, Transformers, RAG, Fine-Tuning, Agentic AI, Generative AI
ML Libraries & Framework: TensorFlow, PyTorch, Scikit-learn, Open-CV, Keras, Pandas, HuggingFace
Tools & Cloud: Git & GitHub, Docker, Power BI, AWS, Linux, Claude Code, Copilot, Antigravity

EXPERIENCE

DIGITALTRANSOLS AI PRIVATE LIMITED, Bangalore **Feb 2026 – June 2026**
AI Intern

- AI Interview Engine (FastAPI, Next.js, Gemini 2.0 Flash): Developed a real-time, bilingual (Kannada/English) platform with multimodal audio transcription and adaptive, rubric-based follow-up questioning to generate detailed performance reports.
- Bulk-Recruitment Pipeline (Telegram): Built a concurrent automated system to parse CSVs, screen candidate profiles against job criteria, and orchestrate interview invitations.

PROJECTS

1. **Intelli-Eye: ML-Based Surveillance System** **Aug 2025 – Dec-2025**
   - **Languages & Frameworks:** Python, OpenCV, YOLOv8
   - **Deep Learning & Hardware:** GPU-Accelerated Pipelines, CNNs, Edge Deployment
   - **Signal Processing:** Audio Anomaly Detection (Screams, Glass Breaking)
   - **Infrastructure**: Real-time Alert Engines, Smart City Frameworks
2. **Personalized Music Recommendation System** **Dec 2024 – Feb 2025**
   - **Machine Learning:** Collaborative Filtering, Content-Based Filtering, K-Means Clustering
   - **Data Processing:** Python (Pandas, NumPy, Scikit-learn), Spotify API
   - **Mathematics & Stats:** PCA (Dimensionality Reduction), t-SNE, Cosine Similarity
   - **Visualization:** Matplotlib, Seaborn, Plotly
3. **Stock Portfolio analysis Agent** **June 2026 – Aug 2026**
   - **CrewAI + FastAPI:** Orchestrates the multi-step stock-analysis workflow and exposes it via a high-performance asynchronous API.
   - **React + Next.js:** Provides a responsive, server-rendered front-end where users input prompts and view live streaming results.
   - **CopilotKit AG - UI Protocol:** Streams agent events (tool calls, intermediate data, final insights) from the backend to the UI in real time via WebSockets.
   - **yfinance + pandas:** Retrieves historical market data and performs the financial calculations, data wrangling, and chart generation.

PUBLICATION

Paper title: Intelli-Eye: A Holistic Deep-Learning Architecture for Predictive Threat Analysis and Intelligent Alert Automation.
Conference: 2026 International Conference on Natural Language Processing and Computer Vision (ICNPCV), IEEE Bangalore.
